- **Monday Mar 16, 2015** Final Paper Acceptance

More on www.cigre.me

The Session will be held in Herceg Novi which is located at a strategic and attractive geographic area between the highest mountain of the Dinara massive, Orjen (1,895 m) and the entrance of one of the most beautiful bays in the world, the Bay of Kotor (Boka Kotorska). Since 1997, the Bay of Kotor has been a part of the Association of most beautiful bays in the world.

The area of the Bay of Kotor is characterized by a Mediterranean climate with dry and warm summers and mild winters. southern exposition, proximity to the sea, limestone substratum and mountainous hinterland which prevents the breakthrough of cold air masses.

Herceg Novi has approximately 200 sunny days per annum. In July and August there are approximately 10.7 sunny hours per day.

Average annual temperature is 16.2 C (similar to Mediterranean cities of Naples and Lisbon). There are frequent slight temperature oscillations, thus, the average daily temperature fluctuation is only 4 C. Average temperature from May to September is about 25 C, which provides a swimming season over 5 months long since the average summer sea temperature is rather high, between 22 - 26 C.

Airports: Dubrovnik 26 km
Tivat 23 km
Podgorica 112 km
